

Beginners' seminar on intellectual property rights

IP for Business

In this two-hour seminar, our experts will provide you with valuable know-how on the most important aspects of intellectual property protection in start-up companies, enabling you to recognize your intellectual property potential in good time, to manage it strategically and to enforce it successfully.

In addition, the seminar will explain the protection possibilities of trade marks, designs, utility models and patents in a practical way and present information and search options at DPMA and partners.

We are offering:

- Basic knowledge for the successful integration of intellectual property rights into corporate development
- Basic knowledge of the use of trademarks, designs and patents in practice
- Improved skills in dealing with your intellectual property rights

The Event

Date is **Tuesday, April 28, 2020**
