

Data available

DEPATISnet provides to you a document archive with well over 100 million data records from about 100 countries. Almost 60% of these data records are directly available in PDF format. Patent documents for the other data records are mostly available to you from the DPMA library.

Country/patent office	Country code	Time range
Austria	AT	since 1920
Switzerland	CH	since 1888
China	CN	since 1985
Germany	DE	
A, B, C documents		since 1877
T documents		since 1978
U documents		since 1934
DD documents	DD	since 1943 *
European Patent Office	EP	since 1978
France	FR	since 1920
United Kingdom	GB	since 1920
Japan (English abstract)	JP	since 1976
Korea	KR	since 1970
USA	US	since 1790
World Intellectual Property Organization	WO	since 1978

* including the documents published since 3 October 1990 by the DMPA, deriving from applications in the GDR

Costs

The use of **DEPATISnet** is free of charge.

German Patent
and Trade Mark Office

DEPATISnet

Worldwide Patent Search for the State of the Art

DEPATISnet provides fast and comfortable access to the electronic **DEPATIS** document archive (German patent information system) of the German Patent and Trade Mark Office (DPMA).

DEPATISnet does not only allow users to search in all German patent documents since 1877 but also to search in documents of many other patent offices and organisations worldwide.

The specifically developed search software, tailored to meet your needs as a casual user or professional patent searcher, will make this vast pool of technical knowledge available to you.

How does **DEPATISnet** work?

DEPATISnet offers a German and an English user interface, and a large variety of search options. It provides five different search modes, accommodating users with different levels of experience (Beginner, Expert, Ikofax, Family and PIZ support).

The patent documents can be searched by various bibliographic data such as title, applicant or inventor. A full text search can be conducted within the complete documents of German (DE), European (EP) publications and publications, published by WIPO (WO) which were published in German, English or French.

The data of the current German documents are available via **DEPATISnet** on the respective publication day (usually on Thursday). The bibliographic data of the documents from other countries will be provided based on a data delivery by the EPO.

An overview is available at <https://depatisnet.dpma.de/DepatisNet/depatisnet?action=datenbestand&switchToLang=en>.

DEPATISnet in detail

- choice of search modes (Beginner, Expert, Ikofax, Family and PIZ support)
- configuration and sorting of the result list
- many download options for the displayed results and result lists
- for German, European documents and for documents of the WIPO: full-text searches within the entire document, where full text is available
- complex search queries using logical and numerical operators, and wildcards
- refined search in the search modes Expert and Ikofax to limit the number of results and narrow down search results
- clear display of bibliographic data in tabular form
- display and printing of documents at different quality levels
- convenient navigation within documents and links to individual subdocuments (title page, description, claims and so on)
- display and storage of a selected full document
- user-friendly scroll function in the full documents of a result list
- search in the International Patent Classification and in the catchword index
- German and English user interface
- link to **DPMAre**gister to access current legal and procedural status data of the files kept at the DPMA since 1988
